

## REGISTRATION

Enclosed is my payment of \$1,600 to confirm my attendance. **Space is limited, so register early.**

Name: \_\_\_\_\_

Address: \_\_\_\_\_

Email: \_\_\_\_\_

Phone #: \_\_\_\_\_

Type of Payment (MC, Visa, AmEx, Check)

If paying by check, please make it payable to:  
Beacon Oral Surgeons.

CC#: \_\_\_\_\_

Expiration Date: \_\_\_\_\_

Name as it appears on the card:  
\_\_\_\_\_

Signature:  
\_\_\_\_\_

If you are planning to bring a staff member to session #1, please list names below:  
\_\_\_\_\_  
\_\_\_\_\_

All forms should be completed and returned to your host by January 8, 2017 to secure participation. If you have any questions, please call Summer at 503-654-3530 .

### Registration/Cancellation

Full tuition payment must accompany all registration forms. Registrants unable to attend their course can obtain a refund (less a \$50 administration fee) by notifying Beacon OS in writing, no later than 30 days prior to the program date. Cancellations past that date may be subject to an additional penalty. Dental CE Solutions is not responsible for any reimbursement due to cancellation of an event. Reimbursement is in the sole responsibility of Beacon Oral Surgeons. Beacon Oral Surgeons reserves the right to cancel a course no later than 14 days prior to the course date. This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between Dental CE Solutions and Beacon Oral Surgeons.

MINI-RESIDENCY

IMPLANT  
RESTORATIVE  
SERIES

Hosted By:

## MINI-RESIDENCY SESSIONS

### Session One

February 3, 2017

#### Anterior Aesthetics and Immediate Provisional Restoration

Patients requiring replacement of anterior teeth present many challenges to the surgeon-restorative dentist team. Proper diagnosis and treatment planning of these cases can be the difference between a successful outcome and one that is not so desirable. Often these cases present as an emergency. This session will present an algorithm for the successful decision making and review the procedures necessary to make an immediate provisional restoration for both single teeth and short spans.

- Identify patients who are candidates for immediate placement and provisionalization with dental implants.
- Understand the procedures and materials necessary to successfully treat a devastating dental injury in the aesthetic zone.

### Session Two

May 12, 2017

#### Prevention and Management of Common Dental Implant Complications

Even in the best of circumstances, complications can occur. With dental implant therapy there is a heightened emotional response to these circumstances in all three members of the team; surgeon, restorative dentist and patient. This session will discuss the most common complications facing the team. Peri-implant mucositis, peri-implantitis, loose and broken screws, material failure and cement sepsis to name a few. Diagnosis, treatment and prevention strategies will be presented.

- To recognize and understand how and why complications occur.
- To create a strategy to prevent these complications for happening.
- To understand how to correct the complications and revise or restore a case if necessary.
- Case updates and new treatment plan presentations from participants.

### Session Three

September 8, 2017

#### The Art and Science of Comprehensive Implant Treatment

Proper treatment planning is the first and most important step in achieving a predictable outcome for our patients. Algorithms for treatment planning based on current science, clinical experience proven practices will be delivered for different case types. Participants are encouraged to bring complex cases for group presentation and planning.

- To understand the steps necessary to properly diagnose and develop a treatment plan for various case types.
- Understand the biologic principals needed to achieve predictable aesthetic results.
- To understand how many implants are necessary to achieve a predictable result.
- To complete a mapping exercise in a mock treatment plan to determine the proper number and placement of implants for a variety of cast types.

### Session Four

November 10, 2017

#### Restorative Decision Making for Successful Implant Prosthetics

When restoring dental implants, restorative dentists are faced with many material choices. This can become confusing and deciphering science from marketing can be impossible. This session will discuss the many design and material choices available for a given case. The advantages and disadvantages of each will be outlined in an evidence based approach.

- To understand the difference between traditional implant specific protocols and digital pathways available for impression making procedures.
- To be able to design and choose an abutment for successful case completion.
- To be understand the different restorative materials available for each cast type.
- To understand the difference between screw and cement retained restorations.
- Case updates and new treatment plan presentations from participants.

### Speaker

#### Gary A. Morris, DDS

Dr. Morris completed his undergraduate studies at Indiana University in Bloomington, Indiana.

He received his dental degree from the University of Illinois at Chicago and completed his residency in Prosthodontics at the UMKC College of Dentistry in Kansas City Missouri. He is an Adjunct Clinical Assistant Professor at Southern Illinois University, School of Dental Medicine. Prior to this appointment he was a Clinical Assistant Professor at the University of Illinois, College of Dentistry. He is a member of the ACP, AO, ADA, ISDS, CDS and is the immediate past president the Chicago Academy of Dental Research. Dr. Morris is vice president of the Illinois section of the ACP. Dr. Morris maintains a private practice, limited to prosthodontics and restorative dentistry, in Buffalo Grove, Illinois. Dr. Morris has a financial relationship with Zimmer Biomet and Dental CE Solutions for speaking.
