

## Registration:

Enclosed is my payment of \$1,900 to confirm my attendance. **Space is limited, so register early.**

Name: \_\_\_\_\_

Address: \_\_\_\_\_

Email: \_\_\_\_\_

Phone #: \_\_\_\_\_

Type of Payment (MC, Visa, AmEx, Ck)  
If paying by check, please make it payable to: Southern Oral & Facial Surgery

CC#: \_\_\_\_\_

Expiration Date: \_\_\_\_\_

Name as it appears on the card: \_\_\_\_\_

Signature: \_\_\_\_\_

**All forms should be completed and returned to your host by March 1, 2017 have any questions, please call 337-560-0131.**

### Registration/Cancellation

Full tuition payment must accompany all registration forms. Registrants unable to attend need to notify the host no later than 30 days prior. Dental CE Solutions is not responsible for any reimbursement due to cancellation. Reimbursement is in the sole responsibility of SOFS. SOFS reserves the right to cancel a course. This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between Dental CE Solutions and SOFS.

Southern Oral & Facial Surgery

Dr. Donald Boudreaux

606 Rue de Brille

New Iberia, LA 70563

Presents:

## A Mini-Residency In Modern Implant Dentistry

## SESSION 1 March 24, 2017

THE ART OF COMPREHENSIVE  
IMPLANT TREATMENT

Proper treatment planning is the first vital step in achieving predictable outcomes. Presenting this treatment plan to the patient properly is the second vital step. We will focus on the diagnosis and planning of multiple cases worked-up by the participants of the course. Cases from all participants will be discussed in detail.

- Present a proactive approach for fees, surgical requirements, and communication between the offices
- Understand biologic principles
- Sequence various clinical cases, implant mapping and surgical considerations
- Treatment planning participant cases.

## SESSION 2 June 2, 2017

## DIGITAL DENTISTRY

Digital technologies are streamlining the dental implant workflow, making the simple delivery of restorations a reality. Clinicians can offer precise, guided, treatment planning, implant placement, digital impressions and CAD/CAM working casts, abutments and restorations. These technologies allow the dental team to deliver expedient, cost effective, and predictable therapies to our patients.

- Discuss the benefits to the practice and patient
- Realize that a digital impression can reduce chairtime
- Provide predictable, easy restorations for their patients
- Overview of Cerac® based abutment & crown fabrication

## SESSION 3 September 8, 2017

TREATMENT PLANNING—IMMEDIATE  
PROVISIONAL RESTORATIONS

Immediate provisional restorations cannot be accomplished on all cases and it is crucial that a full determination is made ahead of time and communicated to the patient. Many times a staged approach works better for the success of the restoration and for the patient.

- Introductory Case Presentations
- Records and Treatment Planning
- Delayed vs Immediate Provisionals
- Final prosthesis occlusion - single, multiple units, overdenture and hybrid.
- Peri-implantitis & mucositis - diagnosis, treatment, prevention

## SESSION 4 January 12, 2018

## SUCCESSFUL IMPLANT PROSTHETICS

When restoring dental implants, every clinician is faced with many choices. We will discuss the restorative options available and why you would choose one over another.

- Restorative Procedures for Multiple Implant Cases
- Cement vs. Screw Retained Options
- Abutment Selection in Implant Dentistry
- Hybrid prosthesis planning: indications, contraindications, alternative treatment modalities, steps required (planning, delivery, recall), lab assistance & fees
- Case Updates and Treatment Planning Additional Cases

**\*Please plan on bringing cases for treatment planning at each session.**

## Speaker:

## Edward R. Schlissel, DDS, MS

Dr. Schlissel received his dental degree from State University of New York (SUNY) at Buffalo, School of Dentistry in Buffalo, New York. He is a Fellow of the Academy of General Dentistry and a member of the Academy of Osseointegration. Dr. Schlissel is currently Assistant Clinical Professor of Surgery in the Division of Oral and Maxillofacial Surgery, Department of Surgery at Emory School of Medicine in Atlanta, Georgia and Professor Emeritus of General Dentistry, School of Dental Medicine at SUNY at Stony Brook in New York. Dr. Schlissel currently maintains a private practice in Marietta, Georgia. Dr. Schlissel has a financial relationship with Zimmer Biomet and Dental CE Solutions for speaking engagements.

Tuition: \$1,900

**ADA CERP®** Continuing Education  
Recognition Program

Dental CE Solutions is an ADA CERP  
recognized provider.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Dental CE Solutions designates this activity for 28 continuing education credits. Continuing Education Credits awarded in the U.S. for participation in the CE activity may not apply towards license renewal in all states. It is the responsibility of each participant to verify the requirements of his/her state licensing board.
