

## Registration

Enclosed is my payment of \$1,750.00 to confirm my attendance. Seating is limited!

Name: \_\_\_\_\_

Address: \_\_\_\_\_  
\_\_\_\_\_

Email: \_\_\_\_\_

Phone #: \_\_\_\_\_

Staff attending session 1 in am: \_\_\_\_\_  
\_\_\_\_\_

Type of Payment (MC, Visa, AmEx, Check)  
If paying by check, make payable to: EIOMS

CC#: \_\_\_\_\_

Expiration Date: \_\_\_\_\_

Name as it appears on the card: \_\_\_\_\_  
\_\_\_\_\_

Signature: \_\_\_\_\_  
\_\_\_\_\_

All forms should be completed and returned to Eastern Iowa OMS by August 2, 2017. If you have any questions, please call or email Brandi Stillions ([brandi@eiofs.com](mailto:brandi@eiofs.com)) (319) 366 8277

### Registration/Cancellation

Full tuition payment must accompany all registration forms. Registrants unable to attend their course can obtain a refund by notifying EIOMS in writing, no later than 30 days prior. Dental CE Solutions is not responsible for any reimbursement due to cancellation of an event. Reimbursement is in the sole responsibility of EIOMS. EIOMS reserves the right to cancel a course no later than 14 days prior to the course date.

Dental CE Solutions is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Dental CE Solutions designates this activity for 35 continuing education credits. Continuing Education Credits awarded in the U.S. for participation in the CE activity may not apply towards license renewal in all states. It is the responsibility of each participant to verify the requirements of his/her state licensing board.

To Attend Our

## Restorative Mini-Residency

5 one-on-one training sessions  
designed to provide better patient  
care.

## Treatment Planning Short Span, Fixed Implant Restorations for Success

Short span implant restorations can be challenging as the considerations of fit, occlusion and aesthetics are crucial to the longevity of the restoration. Fixed implant restorations are desirable as patients prefer restorations that mimic the natural dentition.

### Objectives:

- To recognize the factors that can influence a short span, fixed implant restoration
- To understand how fit and function need to go hand in hand

**\*Staff is encouraged to attend this session in the morning.**

## Session 2 & 3 October 27-28, 2017

### Anterior Aesthetics: Tissue Training, Immediate Loading vs. Delayed Protocols and Restorative Material Choices

Aesthetic dentistry is a rapidly changing discipline. As more anterior teeth are being replaced with dental implants, factors such as tissue management, loading and materials need to be considered. Proper diagnosis and treatment planning is essential for success.

### Objectives:

- To recognize the diagnostic needs for anterior dental implant therapy.
- To understand the biologic principals of implant mapping and decision making
- To understand which provisional restorations are most appropriate for a given restorative plan

### The Transition From Teeth To Dental Implants: Treatment planning and Treating the Edentulous or soon-to-be Edentulous Patients

Tooth loss can be devastating as it signifies a change in your patients oral health. Transitioning the patient from a diseased dentition to a healthy one, can be achieved through diligent treatment planning and a staged approach.

### Objectives:

- To understand how to stage the transition from a natural dentition to dental implants
- To recognize patients concerns and how to alleviate them through communication
- To understand the importance of comprehensive treatment planning

## Session 5 April 6, 2018

### Occlusion, Delivery Procedures and Management of Complications

Occlusion is a controversial subject in dentistry on its own, add dental implants into the mix and it becomes quite complicated. Teeth and dental implants differ in many ways. The periodontal ligament is absent around implants, teeth drift and shift with craniofacial change while dental implants remain stationary. Strategies must be in place to accommodate these differences.

### Objectives:

- To recognize and understand occlusion as it relates to the dental implant patient.
- To learn how to prevent complications related to faulty occlusion.
- To learn how to maintain a patient after dental implant therapy is complete

Dr. Morris completed his undergraduate studies at Indiana University in Bloomington, Indiana. He received his dental degree from the University of Illinois at Chicago and completed his residency in Prosthodontics at the UMKC College of Dentistry in Kansas City Missouri. He is an Adjunct Clinical Assistant Professor at Southern Illinois University, School of Dental Medicine. Prior to this appointment he was a Clinical Assistant Professor at the University of Illinois, College of Dentistry. He is a member of the ACP, AO, ADA, ISDS, CDS and is the immediate past president the Chicago Academy of Dental Research. Dr. Morris is vice president of the Illinois section of the ACP. Dr. Morris has lectured both nationally and internationally and has authored or co-authored numerous articles related to dental implants. Dr. Morris maintains a private practice, limited to prosthodontics and restorative dentistry, in Buffalo Grove, Illinois. Dr. Morris has a financial relationship with DCS and ZB for speaking engagements.

**Program Time:** 8am - 4:30pm  
(Breakfast and Lunch included)

### Venue:

Cedar Rapids Marriott  
1200 Collins Road NE  
Cedar Rapids, IA 52402

### Program Includes:

- 35 Credits
- Treatment Planning Sessions
- One-On-One Peer Interaction

This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between Dental CE Solutions and EOS.
