## **Occlusion, Delivery Procedures and Management of Complications**

### **PROGRAM DESCRIPTION:**

Delivering the final restoration is just as important as the steps taken in the planning process. Occlusion plays an integral role in the longevity of the case.

Occlusion is a controversial subject in dentistry on its own, add dental implants into the mix and it becomes quite complicated. Teeth and dental implants differ in many ways. The periodontal ligament is absent around implants, teeth drift and shift with craniofacial change while dental implants remain stationary. Strategies must be in place to accommodate these differences.

### **PROGRAM OBJECTIVES:**

At the end of the program, the participant should be able to:

- Understand occlusion in the world of implant dentistry
- Be able to perform step by step final delivery procedures
- To recognize and understand occlusion as it relates to the dental implant patient.
- To learn how to prevent complications related to faulty occlusion.

### **SPEAKER: BRUCE R. OUELLETTE, DDS**

Dr. Ouellette received his dental degree from the University of Maryland in Baltimore, Maryland. His professional affiliations include the American Academy of Cosmetic Dentistry, American Dental Association, Florida Academy of Cosmetic Dentistry, American Equilibration Society and the Florida Dental Association. Dr. Ouellette is a former faculty member at the Dawson Academy For Advanced Dental Study in St. Petersburg, Florida, a former Clinical Instructor at Palm Beach State College and Visiting Faculty for advanced continuing dental education at Baylor College of Dentistry in Dallas, Texas. Dr. Ouellette maintains a full-time private practice focusing on occlusion, aesthetics, implant reconstruction and TMJ in West Palm Beach, Florida. Dr. Ouellette has a financial relationship with Zimmer Biomet and DCS for speaking engagements.

### **DATE:**

Thursday, September 14, 2017
