### Registration/Cancellation/CE Credits

Full tuition payment must accompany all registrations. Registrants unable to attend their course can obtain a refund by notifying the host, no later than 14 days prior to the course date. Cancellations past that date may be subject to an additional penalty. Dental CE Solutions is not responsible for any reimbursement due to cancellation of an event. Reimbursement is in the sole responsibility of Dr. Jason Hehr. Dr. Hehr reserves the right to cancel a course no later than 14 days prior to the course date.

Dental CE Solutions is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Dental CE Solutions designates this activity for 28 continuing education credits. Continuing Education Credits awarded in the U.S. for participation in the CE activity may not apply towards license renewal in all states. It is the responsibility of each participant to verify the requirements of his/her state licensing .

## Peak Performance Restorative Series

Hosted By:

## SESSION ONE 11/2/2018

### Efficient Implant Dentistry

Informing patients of all the treatment options available is crucial to patient care. This session will cover patient consultations and why certain restorative options may be better for the patient than another.

- Crown and Bridge Dentistry vs. Dental Implants
- Single, Multiple and Completely Edentulous Spaces
- The Case Work-Up
- Treatment Planning Requirements for Session 2 & 3

\*Staff is encouraged to attend this session.

## SESSION TWO 1/11/2019

### Restorative Decision Making for Successful Implant Prosthetics

When restoring dental implants, restorative dentists are faced with many material choices. This can become confusing and deciphering science from marketing can be difficult. This session will discuss the many design and material choices available. The advantages and disadvantages of each will be outlined in an evidence based approach.

- Difference between traditional implant specific protocols and digital pathways available for impression making
- To design and choose an abutment for successful case completion
- Different restorative materials available for each cast type
- The difference between screw and cement retained restorations.

Bring Cases to be discussed!

## SESSION THREE 4/12/2019

### Full Arch Dental Implant Restorative Techniques

Many options are available to the surgeon and restorative dentist to provide full arch dental implant therapy to patients with a failing dentition. Some patients are candidates for full arch immediate provisional restoration while others are more appropriately treated with a staged approach. Both accomplish the same goal.

- Radiographic guides and CT scans in treatment planning
- Impression Techniques
- Cement vs. Screw Retained
- Treatment Plan Additional Cases

## SESSION FOUR 5/17/2019

### Advanced Single Tooth Implant Restorative Techniques

One of the most challenging restorative cases can be the single tooth implant. As implant dentistry can be an unpredictable science, there are many issues that can occur. Complications can be managed if you identify them quickly, and treat and manage them accordingly. As teeth and dental implants differ in many ways, strategies must be in place to accommodate these differences.

- Challenges with a single implant
- Complications
- Implant occlusion
- Treatment Plan Additional Cases
- Step by step Final Delivery Procedures

## Bruce Ouellette, DDS

Dr. Ouellette received his dental degree from the University of Maryland in Baltimore, Maryland. His professional affiliations include the American Academy of Cosmetic Dentistry, American Dental Association, Florida Academy of Cosmetic Dentistry, American Equilibration Society and the Florida Dental Association. Dr. Ouellette is a former faculty member at the Dawson Academy For Advanced Dental Study in St. Petersburg, Florida, a former Clinical Instructor at Palm Beach State College and Visiting Faculty for advanced continuing dental education at Baylor College of Dentistry in Dallas, Texas. Dr. Ouellette maintains a full-time private practice focusing on occlusion, aesthetics, implant reconstruction and TMJ in West Palm Beach, Florida. Dr. Ouellette has a financial relationship with Dental CE Solutions and Zimmer Biomet for speaking engagements.

### Program Location:

Embassy Suites Hotel  
5055 International Blvd, North  
Charleston SC 29418

**Program Time:** 8am—4:30pm

**Tuition:** \$1,500
