Registration/Cancellation/CE Credits

Full tuition payment must accompany all registration forms. Registrants unable to attend their course can obtain a refund by notifying the host, no later than 14 days prior to the course date. Cancellations past that date may be subject to an additional penalty. Dental CE Solutions is not responsible for any reimbursement due to cancellation of an event. Reimbursement is in the sole responsibility of Battle Creek OMS. Battle Creek OMS reserves the right to cancel a course no later than 14 days prior to the course date. **ADA CERP®**

Dental CE Solutions is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Dental CE Solutions designates this activity for 28 continuing education credits. Continuing Education Credits awarded in the U.S. for participation in the CE activity may not apply towards license renewal in all states. It is the responsibility of each participant to verify the requirements of his/her state licensing.

Battle Creek
ORAL & MAXILLOFACIAL SURGERY

Surgical Excellence with a Personal Touch

The Aesthetics of Implant Dentistry

Speaker:
Bruce R. Ouellette, DDS

March 1, 2019

April 26, 2019

September 27, 2019

November 1, 2019

Battle Creek Oral & Maxillofacial Surgery
3610 Capital Ave SW
Battle Creek, MI 49015

Session 1**March 1, 2019****The Business of Implant Therapy**

Dentistry has changed over the last few years. Clinicians are now faced with having to, not only provide good patient care, they are having to concern themselves with the onslaught of all purpose dental centers. This session will focus on the techniques that the clinician and their staff can use to differentiate themselves. You will learn:

- How to utilize your specialists for better patient care
- How to run a successful practice by providing good service
- How to make sure your staff is well trained and involved in the differentiation process
- **Bring your Restorative Care Coordinator or a key member of your staff to this session**

Homework: Start Treatment Planning Cases for Sessions 2-4

Session 2**April 26, 2019****The Aesthetic Zone**

More anterior teeth are being replaced with dental implants. Although great outcomes are possible, many obstacles abound. Proper diagnosis and treatment planning is essential for success.

You will learn:

- To understand the biologic principals of implant mapping and decision making
- To understand which provisional restorations are most appropriate
- To recognize how tissue biotype and tooth phenotype relate to aesthetics
- To understand material selection as it relates to abutment and restorative design

Session 3**September 27, 2019****Restorative Decision Making for Successful Implant Prosthetics**

When restoring dental implants, restorative dentists are faced with many material choices. This can become confusing and deciphering science from marketing can be impossible. This session will discuss the many design and material choices available for a given case. You will learn:

- To understand the difference between traditional implant specific protocols and digital pathways available
- To be understand the different restorative materials available
- To understand the difference between screw and cement retained restorations

Session 4**November 1, 2019****Current Controversies and Complications in Implant Dentistry**

Patient education has created an awareness of the importance of replacing missing teeth. With this, comes the acceptance of implant dentistry as the treatment of choice. This session will address the restoration of dental implants and how to improve upon the definitive restoration by evaluating the necessary materials and choosing the appropriate ones for less complications.

You will learn:

- How to meet your patients expectations while still providing the care needed
- How to perform necessary tasks and reduce potential complications

Bruce R. Ouellette, DDS

Dr. Ouellette received his dental degree from the University of Maryland in Baltimore, Maryland. His professional affiliations include the American Academy of Cosmetic Dentistry, American Dental Association, Florida Academy of Cosmetic Dentistry, American Equilibration Society and the Florida Dental Association. Dr. Ouellette is a former faculty member at the Dawson Academy For Advanced Dental Study in St. Petersburg, Florida, a former Clinical Instructor at Palm Beach State College and Visiting Faculty for advanced continuing dental education at Baylor College of Dentistry in Dallas, Texas. Dr. Ouellette maintains a full-time private practice focusing on occlusion, aesthetics, implant reconstruction and TMJ in West Palm Beach, Florida.

Dr. Ouellette has a financial relationship with Zimmer Biomet and Dental CE Solutions for speaking engagements.
