(865) 441-2682.**

#### Registration/Cancellation

Full tuition payment must accompany all registration forms. Registrants unable to attend their course can obtain a refund by notifying the practice in writing, no later than 30 days prior. Dental CE Solutions is not responsible for any reimbursement due to cancellation of an event. Reimbursement is in the sole responsibility of Foothills OMS. Foothills OMS reserves the right to cancel a course no later than 14 days prior to the course date. Dental CE Solutions is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Dental CE Solutions designates this activity for 28 continuing education credits. Continuing Education Credits awarded in the U.S. for participation in the CE activity may not apply towards license renewal in all states. It is the responsibility of each participant to verify the requirements of his/her state licensing board.

## Peak Performance Restorative Series

Speaker:  
Gary A. Morris, DDS

Your Host

Foothills Oral & Maxillofacial Surgery  
114 Parliament Drive  
Maryville, TN 37803

*As clinicians, patient care is our #1 priority. In order to continue to provide great care, continued education is necessary. Come Join Us!*

## **Gary A. Morris, DDS**

Dr. Morris completed his undergraduate studies at Indiana University in Bloomington, Indiana. He received his dental degree from the University of Illinois at Chicago and completed his residency in Prosthodontics at the UMKC College of Dentistry in Kansas City Missouri. He is an Adjunct Clinical Assistant Professor at Southern Illinois University, School of Dental Medicine. Prior to this appointment he was a Clinical Assistant Professor at the University of Illinois, College of Dentistry. He is a member of the ACP, AO, ADA, ISDS, CDS and is the immediate past president the Chicago Academy of Dental Research. Dr. Morris is VP of the Illinois section of the ACP. Dr. Morris has lectured both nationally and internationally and has authored or co-authored numerous articles related to dental implants. Dr. Morris maintains a private practice, limited to prosthodontics and restorative dentistry, in Buffalo Grove, IL. Dr. Morris has a financial relationship with Dental CE Solutions, Zimmer Biomet and Southern Implants for speaking engagements.

This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between Dental CE Solutions and Foothills OMS.

**Location:**

**7690 Creekwood Park Boulevard**  
**Lenoir City, TN 37772**

**Program Time: 8am Continental Breakfast**  
**8:30am- 4:30pm Program**  
**12pm Lunch**

**Seating is limited**

# ***Peak Performance Restorative Series***

These sessions are geared towards the restorative clinician who wants to improve their skills for better patient care. The group will consist of those clinicians sharing cases so plan on bringing implant cases for sessions 2-4. Staff is welcome to attend session 1 in the morning as we understand the importance of a great staff.

**Session 1**  
**October 18, 2019**

## **Evaluating your Patient 's Needs for Constructive Comprehensive Treatment Plans**

Treatment planning effectively can increase patient care and acceptance. These plans can include new treatment or the re-restoration of an existing dental implant case. This session will cover the steps necessary when discussing treatment options with your patient.

- Treatment Planning Simple to Complex Implant Cases
- Step by Step Sequencing to Proper Treatment Planning
- Implant Mapping and Surgical Considerations
- Considerations for your Patients in an Insurance Dominated World

**Session 2**  
**November 15, 2019**

## **The Transition from Teeth to Dental Implants**

Tooth loss can be devastating as it signifies a change in your patients' oral health. Transitioning the patient from a diseased dentition to a healthy one, can be achieved through diligent treatment planning and a staged approach.

- Staging the Transition from a Natural Dentition to Dental Implants
- Patients Concerns and How to Alleviate Them through Communication
- Immediate Temporization Techniques and How They can Affect your Patient

**Session 3**  
**March 13, 2020**

## **Restorative Decision Making for Successful Implant Prosthetics**

When restoring dental implants, restorative dentists are faced with many material choices. Deciphering science from marketing can be impossible. This session will discuss the many design and material choices available. The advantages and disadvantages of each will be outlined in an evidence based approach.

- The difference between traditional implant specific protocols and digital pathways
- Designing and choosing an abutment
- Different restorative materials available for each cast type
- The difference between screw and cement retained restorations

**Session 4**  
**May 22, 2020**

## **Occlusion, Delivery Procedures and Management of Complications**

Occlusion is a controversial subject in dentistry on its own, add dental implants into the mix and it becomes quite complicated. Teeth and dental implants differ in many ways. The periodontal ligament is absent around implants, teeth drift and shift with craniofacial change while dental implants remain stationary. Strategies must be in place to accommodate these differences.

- Recognize and understand occlusion as it relates to the dental implant patient
- The prevention of complications related to faulty occlusion
- Maintaining a patient after dental implant therapy is complete
