RSVP by September 25, 2019 for early tuition! For questions or registration please contact Lanae Mierley at (561) 906-7429 (cell) or (561) 743-8311 (office) or email her at mail@sfoms.com.

Registration/Cancellation/CE Credits

Full tuition payment must accompany registration forms. Registrants unable to attend their course can obtain a refund by notifying the host, no later than 14 days prior to the course date. Cancellations past that date may be subject to an additional penalty. Dental CE Solutions is not responsible for any reimbursement due to cancellation of an event. Reimbursement is in the sole responsibility of SFOMS. SFOMS reserves the right to cancel a course no later than 14 days prior to the course date. Dental CE Solutions is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Dental CE Solutions designates this activity for 28 continuing education credits. Continuing Education Credits awarded in the U.S. for participation in the CE activity may not apply towards license renewal in all states. It is the responsibility of each participant to verify the requirements of his/her state licensing. This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between Dental CE Solutions & SFOMS. Dr. Moed has a financial relationship with Dental CE Solutions for speaking engagements.

A Peak Performance™ Implant Restorative Series

Friday
October 25, 2019
January 17, 2020
May 8, 2020
September 18, 2020

Session One 10/25/19

EVALUATING YOUR PATIENTS NEEDS

The initial contact and interaction with any patient is crucial in developing an effective doctor/patient relationship.

The entire dental TEAM must ensure that patients are properly educated and informed of all treatment options available. This session will cover patient consultations from the first phone call to the initial patient visit through the treatment planning consultation and referral to the surgical specialist.

- Identifying Dental Implant Candidates
- Defining the Roles and Responsibilities of all Team Members
- Crown & Bridge Dentistry vs. Dental Implants
- Consulting Effectively with Patients to Achieve Case Acceptance
- The Case Work-Up

**This first session focuses on TEAM building. Staff is strongly encouraged to attend this session!*

Session Two 1/17/20

THE ART OF COMPREHENSIVE IMPLANT TREATMENT

Proper treatment planning is the first vital step in achieving predictable outcomes. This session will focus on the diagnosis and planning of multiple cases worked-up by the participants of the course. Guided surgery and custom abutment therapy will be discussed in determining the best course of action. Cases from all participants will be discussed in detail.

- Diagnosis and Treatment of the Partially and Totally Edentulous Patient
- Understanding the Biologic Principles Involved in Achieving Aesthetic Results
- Step by Step Sequencing of Various Clinical Cases Implant Mapping and Surgical Considerations Treatment Planning Participant Cases

Session Three 5/8/20

SUCCESSFUL IMPLANT PROSTHETICS

When restoring dental implants, every clinician is faced with many choices. Successfully managing the restorative side of implant dentistry can be made easier when implant placement is planned with the surgeon and treatment is outlined for the team. This session will discuss the restorative options available and why you would choose one over another.

- Restorative Procedures for Multiple Implant Cases
- Impression Procedures and Techniques
- Cement vs. Screw Retained Options
- Abutment Selection in Implant Dentistry
- Case Updates and Treatment Planning Additional Cases

Session Four 9/18/20

OCCLUSION, DELIVERY PROCEDURES AND MANAGEMENT OF COMPLICATIONS

Occlusion is a controversial subject in dentistry on its own, add dental implants into the mix and it becomes quite complicated. Teeth and dental implants differ in many ways. The periodontal ligament is absent around implants, teeth drift and shift with craniofacial change while dental implants remain stationary. The maintenance of implant restorations may also differ from a natural dentition. Strategies must be in place to accommodate these differences.

- To recognize and understand occlusion as it relates to the dental implant patient
- To learn how to prevent complications related to faulty occlusion
- To learn how to maintain a patient after dental implant therapy whether it is a single unit or a multi-unit case

Speaker: David Moed, DDS

Dr. Moed received his Doctorate of Dental Surgery from the State University of New York at Buffalo School of Dental Medicine and attained his Prosthodontic Specialty Certificate from New York University College of Dentistry in New York, NY. Dr. Moed is the past President of the Scarsdale Dental Society, a member of the American Dental Association, the Academy of Osseointegration, the Scarsdale Dental Society, New York State Dental Association, and the 9th District Dental Society. He is currently an assistant professor in the Prosthodontic Department at New York University College of Dentistry. Dr. Moed maintains a private practice in White Plains, NY.
