

February 22-23, 2020
Nashville, TN

The Dental Team

The dental team is made up of every staff member from the surgical to the restorative practice. Whether they are directly involved in patient care or manage the patient experience in the front office, each team member has a role.

This program is geared towards the Surgical and Restorative Care Coordinators. The coordinators can be the educator in the practice as they take back the ideas and techniques taught. These coordinators will learn how to grow, not only their role in the practice, but how to grow the practice. They will be educated in the business of dentistry. This will include:

- Developing a tracking system for patient continuity and follow up
- Developing the strategies necessary to improve upon patient consults and follow through in receiving treatment
- Realizing why it is important to manage all aspects of the patient care while educating the staff to do the same
- Insurance coding for procedures
- Patient Introductions and Scripting
- Color Coding for staff and patients

Intended Audience: Surgical and Restorative Care Coordinators

This session will be conducted by:

Dr. Brent Boyse, Dr. Gary Morris, Ms. Jodee Brimhall, Ms. Jamie Schooessling, RDH, BS & Ms. Samantha Foster

CE: 8 Tuition: \$699 (tuition includes 1 & 1/2 day program, breakfast both days and lunch on Saturday)
