

Site-Specific Implants for Advanced Implant Therapy

Presented By:
Steven J. LoCascio, DDS

Course Description:

This course will address advanced treatment solutions that lead to accelerated implant therapy. Single unit, partially edentulous, and fully edentulous patient subsets will be covered.

The techniques shared will provide solutions for patients wishing to accelerate their implant therapy through the avoidance of pre-implant grafting, post extraction immediate implants, and immediate provisionalization or loading. Complex anatomical limitations will be mastered using site-specific implants designed to improve outcomes in these challenging circumstances. The course will also cover prosthetic solutions that improve simplicity and lead to greater patient acceptance.

Steven J. LoCascio, DDS

Dr. LoCascio received his dental degree from Louisiana State University School of Dentistry in New Orleans and completed a General Practice Residency at the Medical Center of Louisiana, Charity Hospital. He returned to the School of Dentistry at Louisiana State University where he was awarded specialty certificates in Prosthodontics and Maxillofacial Prosthetics. Dr. LoCascio is a Clinical Associate Professor in the Department of Oral and Maxillofacial Surgery at the University of Tennessee Medical Center in Knoxville, Tennessee and a Clinical Assistant Professor in the Department of Prosthodontics at Louisiana State University, School of Dentistry, in New Orleans, Louisiana. Dr. LoCascio maintains a private practice limited to prosthodontics and maxillofacial prosthetics in Knoxville, Tennessee.
