

**Dr. Tim Gocke would like to invite you  
to an Educational Program for the Advanced Practice.**

**Friday, September 24, 2021  
Instilling Patient Confidence with Digital Smile Design**

Come with us and discover what dictates a patients' smile and how to design it. A patients' smile is worth a million bucks, so by creating one that they love, will instill a sense of confidence and allow them see the possible. We will cover different ways to design a more pleasing smile through digital dentistry and visualizations that allow patients to see the possibility of better oral health. These technologies allow for the dental implant team to deliver expedient, cost effective and predictable therapies to our patients, in every day practice.

**Friday, November 12, 2021  
Full Arch Dental Implant Case Designs**

Many options are available to the clinician to provide full arch dental implant therapy to patients with a failing dentition. Some patients are candidates for full arch, immediate, provisional restorations while others are more appropriately treated with a staged approach. Both accomplish the same goal. Deciding which treatment plan to move forward with will be discussed on all cases presented.

**February 18, 2022  
Enhanced Aesthetics with Crowns, Veneers and Implant Prosthetics**

Many patients visit our practices just for a better look to their smile. Cosmetic dentistry has evolved into an integral element of contemporary dental practice. We must develop the ability to evaluate existing cosmetic deficiencies and recognize patient expectations to design proper procedure for smile improvement. This evaluation can involve implants, single or multiple-unit, orthodontic spacers designed to increase a space or veneers. By taking all these possibilities into account, aesthetics can be improved. The preparation and materials used are to be part of the aesthetics and function. Provisional techniques, longevity, and cementation methods for various materials will be discussed.

**May 13, 2022  
Now What? Occlusion, Delivery Procedures & Management of  
Complications**

Occlusion is a controversial subject in dentistry on its own, add dental implants into the mix and it becomes quite complicated. Teeth and dental implants differ in many ways. The periodontal ligament is absent around implants, teeth drift and shift with craniofacial change while dental implants remain stationary. Strategies must be in place to accommodate these differences.

**Speaker: Jay S. Smith, DDS**

Dr. Smith earned his Bachelor of Science degree in biology at Furman University in Greenville, South Carolina and received his dental degree and completed his residency in fixed and removable prosthodontics at Emory University in Atlanta, Georgia. He was awarded the Hinman Scholar Award for Scholastic Achievement and appointed to the Emory University School of Medicine advisory committee for continuing education. Dr. Smith is a member of the Academy of Osseointegration, the American Dental Association and the Georgia Dental Association. He maintains a private practice, limited to prosthodontics, in Atlanta, Georgia. Dr. Smith has a financial relationship with Zimmer Biomet for speaking engagements.

**Program Location:** McLean, VA

**Program Time:** 9:00am—5:00pm

Continental Breakfast & Lunch included

**RSVP by August 24th!**

**Tuition:** \$2,500

Early Bird registration \$1,995 if you register by July 24th so Register Now!

**CE:** 7 per session date

Bring your cases to treatment plan at sessions 2, 3 & 4.

**\*\*\*In addition, a complimentary course in Palm Beach, FL will be added. Airfare and hotel will be covered!**

**Please confirm my attendance. Space is limited so register early!**
